

DIY JELLYFISH

SUPPLIES:

Small paper bowl

Markers or paint

Streamers or Ribbon

String (to hang jellyfish)

Tape

Scissors

DIRECTIONS:

1. Start by turning the paper bowl upside down. Color/paint the bowl. Use different colors if you want to make the jellyfish extra colorful. Don't forget to draw eyes!
2. Have an adult use scissors to poke a small hole in the center of the paper bowl. Push your string through the hole, tie a knot in the end and tape it down inside the bowl.
3. Cut long strands of ribbon and tape them to the inside of the bowl. You will want to position it so it hangs down from the center of the bowl. (Have an adult curl the ribbon for an extra fun effect!)
